ABOUT US

We're that merch production and printing company that lives for human connection and thrives on the pain of being in the trenches with the artists, agencies, and musical misfits we serve.

In other words, we actually give a f*ck about our clients, the environment, and the mental health of our team, as we deliver the most eco-friendly and efficient DTG printing services.

We're fueled by defiance, determined to remove the isolation from the artist's journey, and driven to provide second chances for the marginalized and forgotten.
